

National Cut Times

The SWIMS database used by USA Swimming continues to grow in the ways that it is used, the number of meets and times that are loaded, and the accessibility of various kinds of data.

The procedure for submitting times swum here in Niagara to the National Times Database has also been going smoothly, and with the addition of times from most of the Leagues within the LSC we had a total of 163 Sanctioned and Observed Meets loaded into SWIMS from October 2006 through August 2007.

USA Swimming continues to make enhancements and add new capabilities to the database, so that the future will hold new and even more exciting possibilities.

Another important development has been with clearing of names through the district registrar BEFORE the meet. On the Times end, that has made for much cleaner meet databases and many fewer exceptions when meet results are loaded into the national database.

Special Thanks to the National Cut Times officers throughout our district who have helped to keep the process running smoothly - Sue Seiler, June Mundt, Frances Klier, John Rieth, Phyllis Michalski, Maureen Russell & Peter Warren.

If you have any questions, please don't hesitate to contact me.
